

COMPANY PROFILE

Founded in Turin in 1974, SIVIT has established itself as a leader in the production, application, and sale of resins for industrial floors. Leveraging Turin's strong industrial tradition, the company initially focused on developing specialized solutions for the metalworking sector, where floors often face deterioration and heavy loads.

Over time, SIVIT has expanded its presence both nationally and internationally, offering customized solutions for a variety of sectors, including electronics, the food industry, and commercial and residential spaces. These spaces include warehouses, garages, exhibition areas, shops, offices, and apartments.

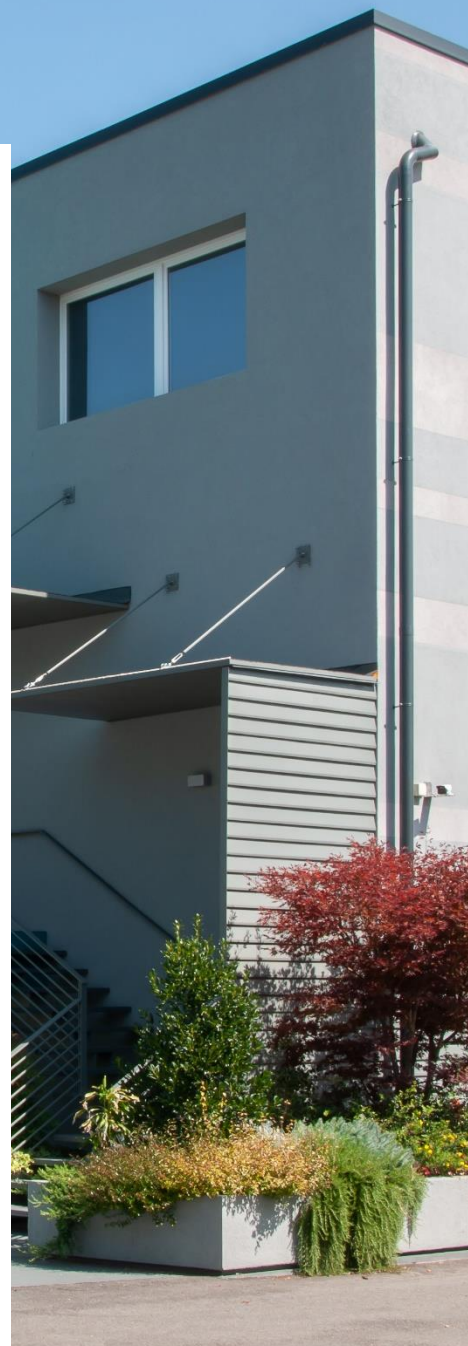

SIVIT is certified under ISO 9001 (Quality), ISO 14001 (Environment), and ISO 45001 (Occupational Health and Safety), ensuring the highest operational standards.

With direct management of the entire product lifecycle—from production to application and commissioning—SIVIT is committed to:

- Constantly improving its products
- Ensuring durability and resistance over time
- Experimenting with new application techniques
- Providing comprehensive training to applicators
- Recommending tailored solutions to customers

Our technical team is ready to analyze any needs and offer detailed information on products and application techniques.
