

Turin, 15/12/22

Declaration of conformity with Reg. 1907/2006 (REACH) and subsequent amendments.

Dear Customer,

as is known, EC Regulation n.1907/2006, REACH regulation (Registration Evaluation Authorization of Chemicals), has been in force since 1 June 2007.).

In the context of this regulation, SIVIT SRL appears as a Downstream User - Formulator., it purchases raw materials from selected suppliers and uses them to produce paints and resin coatings.

In complying with the request of information exchange along the supply chain, the following “**use descriptors**” were shared with raw material suppliers.

Sectors of use:

SU10 Formulation (mixing) of preparations and/or repackaging

SU19 Building and construction work

Products categories:

PC9 Coatings and Paints, Thinners, paint removers

Process categories:

PROC10 Roller application or brushing.

PROC19 Hand-mixing with intimate contact and only PPE available

Our suppliers were thus made aware of how SIVIT and its customers use the purchased mixtures. The suppliers, as producers/importers, were thus able to proceed with the correct registration of the substances by defining appropriate exposure scenarios and indications on risk management measures.

SIVIT constantly verifies that the information received from the supplier is updated through the analysis of the safety data sheets.

In compliance with Annex II of the REACH Reg. (Reg.2015/830) SIVIT issues, distributes and keeps updated its safety data sheets, integrating the exposure scenarios where necessary, as well as modifying the related hazardous labels.

At last, in ref. to art.45 of Reg.1272/2008 (CLP) later modified by Reg.2017/542, SIVIT carries out and keeps updated the PCN (Poison Center Notification) of its dangerous mixtures on the portal of European Chemicals Agency (ECHA). Following this, SIVIT manages and places the assigned UFI codes on its labels.

The notifications actually cover the following EUPCS categories for professional use:

- PC-ADH-2 Building and construction works (except cement-based adhesives)
- PC-PNT-3 Paints/coatings -Protective and functional
- PC-PNT-6 Factory-applied coatings (excludes categories already covered)
- PC-PNT-7 Paint removers, thinners and related auxiliaries
- PC-PNT-OTH Other paints and coating materials
- PC-CON-4 Mortars
- PC-CON-5 Construction chemicals
- PC-CON-OTH Other construction products

We remain available for any clarifications at: regulatory@sivit.it

Best Regards,
Sivit srl
